

Flexicoder 2018 Release Notes

System Requirements

The system requirements for Flexicoder are the same as those for Microsoft Dynamics GP. You can review the Microsoft Dynamics GP 2018 System Requirements documentation on CustomerSource or PartnerSource.

Prerequisites

Installing Flexicoder 2018 on Microsoft Dynamics GP requires that the Microsoft Dynamics GP be version 18.00.0400 or higher. This version is available in the RTM release for Microsoft Dynamics GP 2018.

Installing

If you are currently using Microsoft Dynamics GP 2018, you just need to run through installation steps for this new build of Flexicoder. The documentation on how to install can be found in the Flexicoder Manual.

Upgrading

The Flexicoder upgrade follows the supported upgrade paths from 2015 and 2016 that are available for Microsoft Dynamics GP. You can find these on PartnerSource or CustomerSource in the Upgrading to Microsoft Dynamics GP 2018 Hot Topic.

If you are currently using Microsoft Dynamics GP 2015 or 2016, the Flexicoder upgrade steps can be found in the Flexicoder 2018 Manual.

As in any upgrade process, we recommend that you use a test environment to walk through the upgrade process. By doing this, you can identify and resolve any potential issues that may occur in the upgrade process. A test upgrade also allows you to learn the new features in Flexicoder before putting it into production.

Registration Keys

After installing this Flexicoder build, you will need registration keys for it. These keys are available from your Partner or by calling eOne at 888-319-3663. If you previously had Flexicoder 2018 installed, once you install this update, you will not need to enter new registration keys. If you had Flexicoder 2015 or 2016 installed previously, you will need to enter in new registration keys for Flexicoder 2018.

New Features

18.00.0001

- This release is a compatibility release for Flexicoder 2018. It allows Flexicoder to be compatible with Microsoft Dynamics GP 2018. It will contain the same features/fixes as the Flexicoder 2016 build 16.00.0001 for Microsoft Dynamics GP 2016.

Fix List

18.00.0001

- This release is a compatibility release for Flexicoder 2018. It allows Flexicoder to be compatible with Microsoft Dynamics GP 2018. It will contain the same features/fixes as the Flexicoder 2016 build 16.00.0001 for Microsoft Dynamics GP 2016.

18.00.0002

- Flexicoder is adding extra distribution when recoding the cash account on a SOP invoice that was transferred from an order.
- Limited users receive an error launching Dynamics GP when Flexicoder is installed
- When you enter an invoice with a negative item quantity and positive prices, it uses the wrong sales account.
- Flexicoder Registration - not able to reach registration window in company other than TWO
